

Blackhawk Omni Trucker Mini Antenna

698-960/1710-2700 MHz, 3dBi / 5dBi (BH-OM-206B)

The Blackhawk Trucker Mini antenna is the last product completing the Trucker Series of antennas. We've combined a wideband antenna that can operate on any network in Australia with the flexibility of a smaller length that can be roof, gutter or mirror mounted.

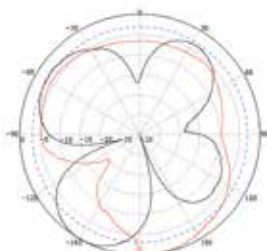

At 40cm length, the antenna will sit below the roofline of most vehicles meaning no more worries about underground car parks or other low clearance areas. Combine with a Cel-Fi GO vehicle repeater to never be out of contact when away from home.

Features:

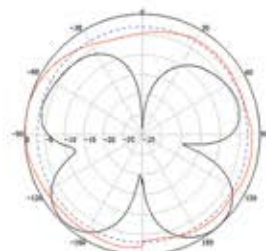

- ♦ Antenna length 400mm
- ♦ Ruggedised construction for extreme conditions
- ♦ Able to be roof, gutter or mirror mounted
- ♦ Comes with L Bracket for mounting
- ♦ Supplied with 4 metres of LMR240 ultra flex cable supplied with SMA
- ♦ Ideal antenna for the Cel-Fi GO Mobile vehicle repeater

BLACKHAWK OMNI TRUCKER MINI

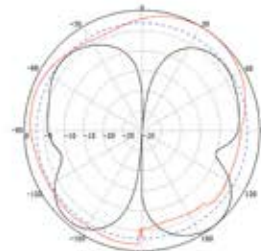

ELECTRICAL SPECIFICATIONS	MECHANICAL SPECIFICATIONS
Freq Range 698-960/1710-2700MHz	Dimensions L 400mm x D 16mm
Impedance 50 Ω	Weight 0.50kg
VSWR ≤ 2.0	Operating Temperature -40°C- to +65°C
Gain 3dBi/5dBi	Termination SMA Male
Max Input Power 100W	Material Glass / Steel
Vertical Beamwidth 60°	Antenna Colour Black
Horiz. Beamwidth 360°	Diameter of installing pole 32.5mm
	Cable LMR240 Ultra Flex 4m
